

COMPLETE GRAIN RATIONS

Maximise finishing potential, cost effectively

Top Country specialises in complete grain mashes that combine rolled grains, effective fibre, protein meals, buffers and minerals. Our Starter and Finisher rations combine the use of buffers and roughage to allow a steady and safe introduction to grain feeding, therefore reducing the risk of acidosis, gorging and bloat dramatically. It is recommended that cattle are put onto good quality hay and have a full rumen for around 3 days prior to starting any grain program. This feeding program can be fed in the paddock or in a feedlot situation; consumptions are targeted at 2.5-2.7% bodyweight. The size of the paddock and the quantity & quality of roughage available can alter consumptions.

- ✔ Achieve high weight gains and improve fat cover and carcass quality.
- ✔ Opens opportunities to finish stock when pasture quality and/or quantity are low
- ✔ Complete and balanced feed so can be fed on its own
- ✔ Highly palatable so that consistent results are achieved
- ✔ Ideal for use in self feeders and can be bulk delivered straight into your feeders for ease of management

PRODUCT	SUITABILITY	PROTEIN (CP) (%)	ENERGY (ME) (MJ/KG)	FAT (%)	FIBRE (%)
Top Starter 1	Starting cattle on grain as it has high levels of fibre; Extending Dry Feed	13	12.0	4	21
Top Starter 2	Feeding in the paddock with hayed off feed; more grain less fibre	14	12.8	4	17
Top Finisher	For quicker turnoffs; use after starter rations	13	13	3.7	14
Top Beef Concentrate	Medicated mineral & vitamin feedlot concentrate	49	4.5	4.55	5.8

The leading edge in livestock feed

SELT LIMITING Paddock PRODUCTION FEEDS

For increasing growth rates and finish on pasture

Top Country offers a range of protein meal-based production feeds with low to moderate grain inclusions that are designed to be fed with pasture or hay.

- ✔ Affordable and cost effective
- ✔ Self-regulating with intake targeted at 0.5% to 1% bodyweight
- ✔ Safe and balanced, providing a full complement of vitamins and minerals
- ✔ Perfect for spike feeding heifers prior to joining
- ✔ Grow backgrounding cattle up to feedlot entry weight during winter
- ✔ Helps to extend grazing life of oats and forage crops
- ✔ Improves utilization of pastures and maximizes dry matter intake
