

WHEN MINERALS ARE THE MOST LIMITING NUTRIENTS

Top Country offers a range of concentrated mineral supplements to balance the deficiencies of stock grazing lush pastures. High phosphorus protein meal based loose supplements that are designed to be fed in the paddock or on crops such as oats and forage sorghum.

- ✔ Available in a range of palatability levels to achieve consumptions between 100-300g/head/day
- ✔ Low cost with a high return on investment due to the boost in productivity
- ✔ Safe to feed with higher levels of minerals such as calcium and phosphorus to match the higher requirements stock possess when they have increased weight gains on green feed/crops
- ✔ Huge benefit gained from slowing down the rate of passage of lush feed. This allows the pasture to be utilised more efficiently instead of it being “squirting” out their back end, therefore increased weight gains can be achieved.

PRODUCT	SUITABILITY	UREA (%)	PHOS (P) (%)	CALCIUM (CA) (%)	SULPHUR (%)	MG (%)	PROTEIN (CP) (%)
Top Crop	Green pastures, oats and winter cereal crops, lucerna	0	6	12	2	2	9-24
Top Forage	Aid in the prevention of prussic acid toxicity and for improved performance on forage sorghum	0	4	8	8	1	10-24
Top Legume	Cattle grazing on bloat prone pastures such as clover, medics and Lucerne	0	1	2	1	2	34

HIGH PHOSPHORUS SUPPLEMENTS FOR GROWTH, REPRODUCTION AND LACTATION

Top Country offers a range of high phosphorus supplements for stock grazing on low phosphorus pastures and mulga. High levels of phosphorus supplementation is essential for meeting the mineral requirements of lactating breeders and reducing the interval between calving and return to oestrus. Phosphorus is also an effective limiter, used to maintain reasonable consumptions in dry times.

- ✔ Available in a range of palatability levels to achieve consumptions between 100-300g/head/day
- ✔ Contains high quality sources of phosphorus to maximise P availability and absorption
- ✔ Maximizes milk production
- ✔ Supports reproduction and higher calving rates
- ✔ Helps meet the additional minerals requirements of young, growing stock
- ✔ Customised to suit your grazing conditions

PRODUCT	SUITABILITY	UREA (%)	PHOS (P) (%)	CALCIUM (CA) (%)	SULPHUR (%)	MG (%)	PROTEIN (CP) (%)
Top Fos	Year round supplement for breeders on phos deficient country and as a transition supplement for all stock above 200kg on hayed off feed.	2.5-30	6	12	2	1	26-87
Top Wet	High mineral inclusion ideal for lush pastures (particularly mixed-natives) or where bone chewing is observed.	0	9	12	4	1	20
