

PRODUCTION SUPPLEMENTS AND COMPLETE FEEDS

For joining, weaning, fattening and more

Top country offers a range of production and complete grain rations for Sheep and Goats. Our production rations are designed with a protein meal foundation and a low grain inclusion. These production rations are suitably fed in paddock conditions to optimise feed intake and productivity. Our complete rations have been formulated for finishing animals either on pasture or in an intense feeding situation. By using the

balanced program for starting and finishing animals, Lambs and Goats can reach optimal weight rangers earlier and therefore meeting oportune markets faster.

- ✔ **Affordable and cost effective**
- ✔ **Self-regulating to 0.5% to 1% bodyweight intake for production rations**

PRODUCT	SUITABILITY	PROTEIN (CP) (%)	ENERGY (ME) (MJ/KG)	FAT (%)	FIBRE (NDF %)
Top Production 1% Urea	Use on dry feed where extra energy/protein is needed	35	11.8	5.6	26
Top Ewe Flush	Spike feed prior to joining and during lambing	23	12.85	6	27.8
Top Early Wean Lamb/Goat	Lambs/Kids under 10 kgs live weight	18	14	5.2	23.3
Top Wean Lamb/Goat	Lambs/Kids between 10-20kg liveweight	15.6	13	3.4	24.2
Top Starter Lamb/Goat	Safe introduction to grain	15	12	3.7	29.3
Top Fat Lamb/Goat	Quicker turn-offs	15	12.5	4.1	25.1

PREMIUM QUALITY DRY PASTURE SUPPLEMENTS

Cottonseed meal-based protein supplements with balanced minerals

Top Country's sheep and goat dry season supplement ensures the maximum levels of essential nutrients are absorbed for maintenance, milk production, fertility and growth.

- ✔ Customised to suit your needs
- ✔ Various urea, salt, and phosphorus levels available
- ✔ Increase dry matter intake
- ✔ Increase performance
- ✔ Cost effective
- ✔ Ideal for use in Top Country

Feeda Top Intro, Top Start and Top Browse

This range has a variation in urea levels, ranging from 2.5% to 7.5% urea, to allow intakes to increase at a steady and safe rate. It is designed for pastures with a protein deficit and where increased minerals are not required. It is ideal for weaned lambs/kids and growing stock. The high levels of protein increase daily intakes and energy levels.

Top Intro XP, Top Start XP, Top Browse XP

This range is designed for sheep and goats grazing deficient dry standing feed, and have a higher vitamin and mineral requirement. Lactating ewes and nannies have a high requirement for minerals, especially phosphorus for milk production, and the XP range is ideal for them. It is still designed to be fed during the drier seasons, however with 3% phosphorus and 6% calcium it is an ideal supplement to be feeding to ensure optimal milk production, growth, and re-conception rates and weaning weights.

PRODUCT	SUITABILITY	UREA (%)	PHOS (P) (%)	CALCIUM (CA) (%)	SULPHUR (%)	PROTEIN (CP) (%)
Top Intro	Safe introduction to dry lick for when protein is limiting	2.5	1	3	1.4	28-50
Top Intro XP	Safe introduction to dry lick when extra minerals are needed for production	2.5	3	6	1.4	26-47
Top Start	Use on dry standing feed	5	1	3	1.4	30-53
Top Start XP	Use dry standing feed for breeding stock or animals on phosphorus deficient country	5	3	6	1.4	32-50
Top Browse	Use on feed which requires more urea to digest efficiently	7.5	1	3	1.4	40-62
Top Browse XP	Use on feed which requires more urea to digest efficiently and is on marginal country such as mulga	7.5	3	6	1.4	38-60
