

## COMPLETE GRAIN RATIONS DESIGNED FOR EARLY WEANING

### For reaching maximum growth potential

Top Country offers a range of high energy and high protein weaning rations that combine rolled grains, effective fibre and easily digestible protein meals. These rations are in the form of a mash and contain vitamins and minerals as well as Monensin Sodium to prevent scouring, sickness, ill-thrift and death in calves and weaners.

- ✔ Affordable and cost effective with potential for high daily weight gains
- ✔ Complete diet with consumptions targeted at 2.5% of body weight
- ✔ As the rumen starts to develop in older weaners, the ration changes to increase effective fibre for safety
- ✔ Supplies essential amino acids that are needed for development and muscle growth.
- ✔ In drought, calves will not be restricted nutritionally and mothers can reduce their requirements
- ✔ Assists in the development in secondary muscle fibres that increases future finishing potential
- ✔ Can be fed ad-lib either in the paddock in calf creep feeders or in intensive situations (self-feeders)

PRODUCT	SUITABILITY	PROTEIN (CP) (%)	ENERGY (ME) (MJ/KG)	FAT (%)	FIBRE (%)
<b>Top Early Wean 100</b>	Early weaned calves between 50-150kg (4 weeks to 4 months)	18	12.3	4.2	7.9
<b>Top Wean 200</b>	Weaners between 150-250kg or older than 4 months	14	11	2.9	9.7

## SELF LIMITING Paddock PRODUCTION FEEDS

### Improving weight gains whilst utilising pasture

Top Country offers a range of protein meal-based production feeds with low to moderate grain inclusions designed to be fed with pasture or hay.

- ✔ Affordable and cost effective
- ✔ Self-regulating with intake targeted at 0.5% to 1% bodyweight
- ✔ Safe and balanced, providing a full complement of vitamins and minerals
- ✔ Perfect for weaning with hay and continuing on in the paddock
- ✔ Ideal for weaning and yearling growth encouraging structural soundness and muscle growth
- ✔ Helps to extend grazing life of oats and forage crops
- ✔ Improves utilization of pastures and maximizes dry matter intake

PRODUCT	SUITABILITY	PROTEIN (CP) (%)	ENERGY (ME) (MJ/KG)	FAT (%)	FIBRE (%)
Top Background	Green Feed, Extending Dry Feed	40	10.2	6.6	2.5
Top Grower	Hayed off Feed	28	10.8	6.3	1
Top Production	Bulk Dry Feed	22	11	4.0	<1
